

Webinars: Fundamentals of equine practice

Practical management of the coughing horse

Tuesday 10th June 2025

You've been treating a horse for weeks but the cough doesn't go away? Puzzled by the meaning of your airway cytology? Don't despair...

About this course

The webinar is aimed at recent graduates starting out in equine practice and mixed practitioners wanting to update their equine knowledge and treatment repertoire. A step-by-step approach will guide you through diagnosis and management of the most common and some not so common respiratory conditions in horses. Each section provides practical tips and tricks how to obtain the best samples, what to do if there is no response to treatment and how to deal with economic constraints. Problems including non-compliant patients and clients and ways to deal with those will also be discussed.

Diagnosis and management of infectious and non-infectious respiratory conditions in horses will be covered.

The webinar will run **12.30pm to 1.30pm** on the above date.

Tutor

Bettina Dunkel

DVM PhD DipACVIM DipACVECC DipECEIM FHEA MRCVS
Professor in Equine Internal Medicine and ECC
The Royal Veterinary College
