

Webinars: Fundamentals of equine practice

Forelimb vs. hindlimb proximal suspensory desmitis

Tuesday 22nd April 2025

Unravel the important differences between forelimb and hindlimb PSD

About this course

This webinar will discuss the main differences between forelimb and hindlimb PSD. Initially we will discuss the careful diagnostic approach to these cases, followed by treatment options and their associated prognosis (including differences between the two conditions).

Why do this course?

This webinar will be aimed at vets who have an interest in orthopaedics or are keen to develop an interest in this area since this condition is commonly encountered by all equine vets. Delegates will learn how to accurately diagnose and appropriately treat PSD – importantly highlighting the key differences between whether it is the forelimb or the hindlimb that is affected.

Key areas

- Forelimb PSD
- Hindlimb PSD
- Differences between the diagnostic and therapeutic approaches

The webinar will run **12.30pm to 1.30pm** London time on the above date.

Tutor

Alex Hawkins, BSc BVSc MVetMed DipECVS MRCVS
Lecturer in Equine Surgery
The Royal Veterinary College
