

Webinar Series: Fundamentals of equine practice

Nerve blocks principle and applications

Monday 16th March

Do you want to increase your confidence in performing and interpreting nerve blocks for the benefit of your patients?

This course is aimed at new and recent graduates and veterinarians wanting to improve their confidence in regard to nerve blocks. After a refresher in anatomical knowledge in regard to loco-regional anaesthesia, principles of nerve blocking will be explored with specific emphasis on nerve block interpretation.

Why do this course?

It is designed to give the equine practitioners who deal with lameness a better understanding of the use of loco-regional anaesthesia and its interpretation.

Key areas:

- The common anaesthetic agent used in lameness diagnosis
- Common landmarks and techniques used for nerve blocks in the forelimb and hindlimb
- How to interpret the results of your loco-regional anaesthesia.

.

Tutor

Melanie Perrier Dr.med.vet DipDACVS DipDECVS CERP MRCVS
Senior Lecturer in Equine Surgery
Royal Veterinary College
