

## Webinars: Fundamentals of equine practice

### Oh no, I think it's ataxic! A practical approach to the neurological examination of the horse

Tuesday 16th April 2024

#### About this course

This webinar will provide veterinarians from mixed or equine practice with the practical skills to determine if a neurological abnormality exists and the knowledge and confidence to interpret their findings in order to localise the lesion to a specific anatomic region of the nervous system.

#### Why do this course?

Neurological disease is a common problem encountered in equine practice and the ability to perform a neurological examination is an essential skill that all veterinarians involved in equine practice should learn.

#### Key areas

The procedure and sequence for the neurological examination, followed by interpretation of the findings in order to localise the lesion/s to a specific anatomical region of the nervous system. Videos will be used to demonstrate the various neurological syndromes that may be encountered in practice; and practitioners will have an opportunity to practise localising the lesion on a wide variety of different cases.

The webinar will run **12.30pm to 1.30pm** London time on the above date.

## Tutor

**Mike Hewetson**, BSc BVSc CertEM DipECEIM MRCVS  
Associate Professor in Equine Medicine (Clinical Educator Track)  
The Royal Veterinary College
