

Webinars: Fundamentals of equine practice

Equine gastric ulcer conundrums: Glandular gastric disease

Tuesday 21st May 2024

About this course

This is second of a two-part webinar series on equine gastric ulcer syndrome (EGUS). In this webinar, we will review the prevalence, aetiopathogenesis, clinical signs, diagnosis, treatment and prevention of equine glandular gastric disease (EGGD). The emphasis is on adult horses, but the basic principles also apply to foals.

Why do this course?

The webinar is aimed at equine vets who manage horses with gastric ulcers. The aim is to refresh some of the fundamentals that you may have forgotten, and to explore recent developments that might be of relevance to how you manage these cases in practice.

Key areas

- Normal anatomy and physiology of the equine stomach with specific emphasis on the glandular epithelium
- Pathology, pathogenesis, and recognised or putative risk factors.
- Clinical signs
- Diagnosis
- Evidence based approach to treatment, including the use of different omeprazole formulations and other pharmacological methods of disease management.
- Tips on how to manage non-responders.
- Management and prevention

The webinar will run **12.30pm to 1.30pm** London time on the above date.

Tutor

Mike Hewetson, BSc BVSc CertEM DipECEIM MRCVS
Associate Professor in Equine Medicine (Clinical Educator Track)
The Royal Veterinary College
