

Webinar series: Advanced nephrology and urology

FGF23: What does the new marker mean?

Monday 16th September 2024

Key Areas

- The pathophysiology of CKD-mineral and bone disorder
- How to measure FGF23 in practice
- Which feline patients will benefit from FGF23 measurement

How can I use the novel biomarker fibroblast growth factor-23 in practice: where can I measure it and what will the result tell me?

This webinar will review and explain the pathogenesis of CKD-mineral and bone disorder, including the key role of FGF23. How and where to measure FGF23 for cases in practice will be outlined and how to interpret the results will be briefly discussed.

Why do this course?

This course is aimed at veterinary surgeons who would like to expand their understanding of CKD-mineral and bone disorder in cats. Following this webinar vets will feel confident to know when and how to measure FGF23 and how to interpret the result.

The webinar will run **12.30pm to 1.30pm** on the above date.
